

I am Sachin P George (2013-2017 batch), I have completed my mechanical engineering. As our chancellor says “We are Chosen by god to study in Karunya University“, and it proves to be very true in my life. I completed my 12th std with a very descent marks and applied to a lot of college but could not clear any of their entrance examination and Karunya Entrance Exam was my final hope. I wrote the exam with lots of pray and preparation and I was able to clear the entrance exam and was able get a mechanical seat which I always dreamt of. Bedestha was a very important place to me. Whenever I had Ups or down I go there pray before the holy cross. In my 4 years for college life whenever I felt low I was risen up as soon as I go there to bedestha and tell god my problem and at the same time when I had happiness, I used to go there and thank him for the blessing that he had showered on me . Coming to placement , I never had the confidence that I will be able to get a job before I leave the college , but god proved me wrong , he helped me get selected in the very first company Accenture that came for placement . So if you ask me what Karunya University is, I would say: A place where you can experience god’s presence and what may come, god almighty is also was there and will give you the strength to come over all the problems and shine in your life.
