

PRIYA NAYEK

Financial Officer,

WeMakeScholars

Hyderabad, Telangana.

My four years at Karunya Institute of Technology and Sciences has been the best and amazing memory to cherish. The years spent here had been me learn and explore a lot which I would never do if I would not have come a long way here to Karunya. The environment and the facilities of our Department of Biotechnology, has always motivated each and every student to pursue their dreams that too in an effective way too. The years spent here have been full of learning opportunities that were full of fun and sometimes with academic grind that one has to go through.

My life at KITS made me much stronger and took me a step ahead for being an independent woman. When I got placed in WeMakeScholars, one thing asked me was “Why Karunya Institute”? This was a great as well as the best question I got to answer. Definitely without any second thought I said- “It’s Environment and the wide Learning opportunities”. Hence, it is proved from years. Students of Karunya not only excel in different fields but also hold the best positions across the world.
