EMURGO FOR A NEW ACADEMIC VENTURE

The Department of Computer Science and Engineering, Karunya Institute of Technology and Sciences has signed MoA with EMURGO Academy. The MoA will enable the Department to design an internationally relevant curriculum for their B.Tech and M.Tech. Programs and provide opportunities to work on live projects in this revolutionary technology that has gained a strong foothold in the global market. Blockchain Technology has found its way to the Indian fintech ecosystem and has made its presence felt in profound ways, therefore training students at the college level could help in bringing more industry-ready blockchain experts to the market. The education system in India needs enormous transformation to be on par with the current trends in technology and must introduce novel concepts in the curriculum. With the help of EMURGO Academy, our students will gain exposure in the potential use of blockchain technology, facilitating them to be industry-ready graduates, employable in leading companies offering high salary packages.
