[5] Transportation (TR)

[5.5] Shuttle Services

Number of battery operated shuttle cars: 1

Description:

KITS is committed to maintaining a sustainable and eco-friendly campus by providing shuttle services using battery-operated cars within its premises. As a recognized green campus, KITS covers a large area that can be challenging to navigate by foot. The electric shuttle system ensures that transportation to academic buildings, the library, and other facilities is both convenient and environmentally conscious. This service is not only highly practical, helping students and staff efficiently move around the campus for various needs, but it also promotes campus unity. Shuttle rides often become opportunities for engaging conversations, shared laughter, and bonding among students and faculty, thereby strengthening the sense of community. The campus shuttle service truly reflects the easygoing and inclusive spirit of life at KITS, making daily commutes both enjoyable and essential for everyone on campus.
